Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/575,643	Applicant(s) NEWTON, JOHN	
	Examiner Kurt Rowan	Art Unit 3643	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 2, 7, 8, 11, 13, 14, 16, 17, 20, 26, 28, 29, 33, 34 and 37 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 2, 7, 8, 11, 13, 14, 16, 17, 20, 26, 28, 29, 33, 34 and 37 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2, 7-8, 11, 16-17, 26, 28, 29, 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP '146 as applied to claim 1 above, and further in view of Nowak (US 5497576).

The EP '146 patent shows an access portion, an entrapment portion accessible via the access portion, detection means, means for indicating detection the presence of a pest once in the region of the entrapment portion. EP '146 shows inspection means arranged to allow for viewing of a trapped pest. EP '146 shows a surface portion between the access portion and the entrapment portion. EP '146 does not show a roughened texture to a surface portion or an adhesive coated surface. The patent to Nowak shows a trap having a surface portion with an adhesive area 25 and a crawling area 12. Nowak shows an area having a relatively roughened texture 31 and at least one further section 23 of the member having a relatively smooth texture. In reference to claim 1, it would have been obvious to provide EP '146 with a roughened texture on a surface portion as shown by Nowak to provide traction to the target species while entering the trap. In reference to claim 2, EP '146 shows that the access portion is

arranged to guide a pest towards the entrapment portion. In reference to claims 7-8, it would have been obvious to provide EP '146 with a surface portion such as the adhesive that is arranged to discourage a pest from traversing there over. In reference to claim 16, EP '146 shows a light emitting diode as a visual signal. In reference to claim 17, EP '146 discloses transmitting a data signal to a remote location in column 6, lines 50-53. In reference to claim 26, EP '146 shows a removable locating frame 12a-12e that are inherently removable. In reference to claim 28, EP '146 shows downwardly depending leg members 4a. The examiner notes the presence of several "means for" clauses, but will give the claims their broadest reasonable interpretation unless applicant specifically invokes 35 USC 112, 6th paragraph. In reference to claim 29, Nowak shows leg members 29 to guide the pest to the adhesive material 25. It would have been obvious to provide EP '146 with adhesive material as shown by Nowak for the purpose of catching pests.

3. Claims 33-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP '146 in view of Nowak as applied to claim 29 above, and further in view of Gatewood, Jr. (US 5673509).

The patents to EP '146 and Nowak show pest traps and have been discussed above. The patent to Gatewood shows a disposable trap having an entrapment portion comprising a flat foldable member with an adhesive portion 24 provided on a first portion and a window 22 formed on a second portion such that the second portion is folded onto the first portion, the adhesive material is exposed through the window. See

Fig. 1. in reference to claim 33, it would have been obvious to provide the trap of EP '146 as modified by Nowak with a flat foldable member with an adhesive portion as shown by Gatewood since merely one equivalent mechanical structural member is being substituted for another and the function is the same.

4. Claims 13-14, 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP '146 in view of Nowak as applied to claim 1 above, and further in view of Celestine (US 6016623).

The EP '146 patent and Nowak show pest traps as discussed above. EP '146 shows a trap having detection means but not an emitter/detector pair. The patent to Celestine shows a trap having a detection means comprising an emitter/detector pair arranged such that a radiation beam extending between the emitter/detector pair is broken by a pest. In reference to claim 13, it would have been obvious to provide EP '146 patent as modified by Nowak with an emitter/detector pair as shown by Celestine since merely one detector is being substituted for another and the function is the same. In reference to claim 20, Celestine shows the detection means 35 (located in the main housing) and the means for indicating detection 46 (located in housing 40) being located in separate housings.

Response to Arguments

5. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection. Applicant's response overcomes the rejection under 35 USC 112, second paragraph. Nowak shows a surface portion with a

Art Unit: 3643

relatively roughened texture so as to encourage the pest towards the entrapment portion. Nowak further shows another region of the surface as having a relatively smooth texture for keeping the pest on the roughened portion or the entrapment portion. Applicant argues that Nowak does not show a portion arranged to prevent a pest from escaping from the entrapment portion once captured, but an area of the adhesive which widens as the a pest proceeds along the crawling area 12 acts to prevent a pest from escaping since there is a larger adhesive area which a pest would have to pass over to escape. Applicant further argues against a then as yet made combination of EP '146 and Nowak, but merely argues functional limitations such as the pest evading detection and capture. In regard to claims 33-34, and 38, Applicant's arguments, have been noted, but since these claims depended from a canceled claim, it was not clear what limitations should be included other than what is recited those claims. In regard to claims 13-14, and 20 amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references. Applicant's arguments, in regard to claims 13-14, and 20 do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

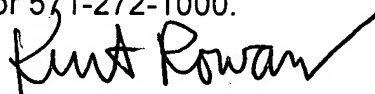

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kurt Rowan whose telephone number is (571) 272-6893. The examiner can normally be reached on Monday-Thursday 6:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Poon can be reached on (571) 272-6891. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
